To whom it may concern:

This is a statement about Glenvue Holstiens managed by TheDunton family. Glenvue Holsteins have been managed by the Dunton family for over 75 years I have been involved with them for over 50 years

The Dunton management have excellent knowledge of dairy cow management. Their husbandry allows for individual attention to each cow so they can exhibit their genetic potential adjusting the environment required. They have variety genetic lines in the herd. They acquire cows from different situations because under their management she will develop into a better animal. This evident by the number of Breeder Shields they have been awarded. Also by the number of times their cows have reached the winner's circle, at Holstein shows.

Their cows are on a routine foot trimming program.

This herd has reached all the requirements of Canadian Quality Milk Programs and ProAction [going forward 2]

These cows are vaccinated with IBR, PI3, BVD 2, BRSV and Leptospira [Triangle 10] and scourguard 4 K C also strategically with an E. coli [J vacc 5] . The vaccination program starts at 4 months of age and runs continually year around.

Sincerely:

L. P. Stewart
